EXTRACTS FROM RESEARCH

CHAPTER 3

VOLUME OF RUSSIAN MARKET OF FLOUR
CONFECTIONERY

A two year crisis decrease (2008 - 2009) in the dynamics of Russian import of flour confectionery followed by growth of import deliveries started in 2010. Amount of products imported in 2011 was by 25.7% larger than in the previous year; in 2012-2013 increase rates were at the level of 8-9%.

Against a slowed down increase of production, active growth of import affected share of foreign products on Russian market. According to the experts of Intesco Research Group in 2013 import products reached **% of the market, that is by 1.3 p.p. exceeds values of 2010. Considering an

increasing demand for non-traditional flour products among Russian population, foreign companies are able to enlarge their share in Russia.

CHAPTER 11

ANALYSIS OF IMPORT OF
FLOUR CONFECTIONERY

In 2007 – 2009 volume of flour confectionery imported to Russia was characterized by *типичным* dynamics. In two years deliveries reduced by 18.6% or ** *тс. т.* However from 2010 volumes started recovering, and already in 2011 they exceeded the values of 2007. It should be noted that the largest increase in volumes of import products (more than by one fourth) was recorded exactly in 2011.

In 2013 ** *тс. т.* of products were delivered to Russian market. It is by 8.1% more than the value of 2012.

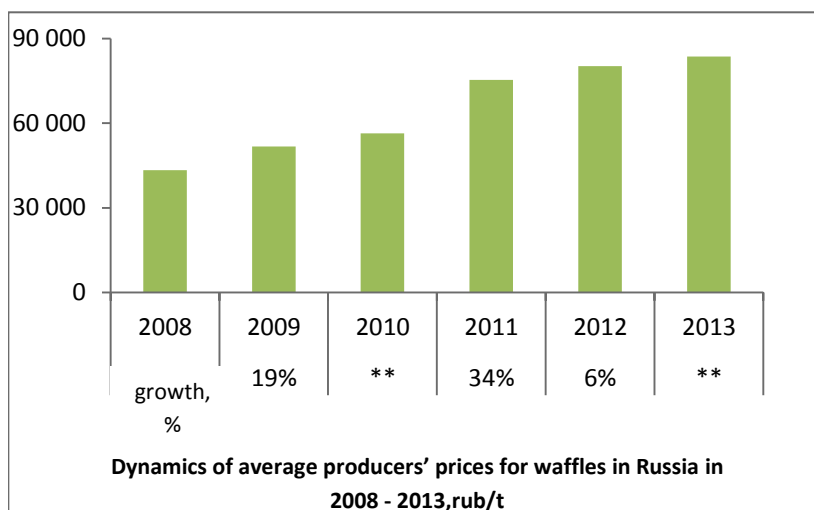

The largest share in the structure of Russian import of flour confectionery in 2013 was constituted by dry sweet biscuits – 73.3%. One fifth was made up by waffles and wafers (22.2%) and only 4.5% belonged to ginger biscuits and similar products.

CHAPTER 13

**PRODUCERS' PRICES FOR FLOUR
CONFECTIONERY**

During 2008-2013 growth of sale prices for waffles has been observing. In 2013 the price grew almost 2 times in comparison to 2008 and amounted to **7 ths. rub/t. At that it should be noted that during last two years increase rate of prices for waffles was lower than the official inflation rate (*% in 2013).

Throughout the period analyzed average producers' prices for biscuits demonstrated a steady growth. The largest increase in prices was recorded in 2009 and 2011 – +**% each year. In 2013 an analogous value amounted to **%. Therefore in 2013 producers' sale prices for biscuits in Russia increased almost two

times in comparison to 2008 and reached **.5 ths. rub/t.

In 2010 due to amendments to All-Russian Classification of Products producers' prices for biscuits have been considered including two more items: sweet biscuits and dry biscuits (hard biscuits and crackers).

Average price for sweet biscuits amounted to *7.4 ths. rub/t in 2013. This value exceeds

price for hard biscuits and crackers by 16.9 ths. rub/t, which were sold at a price of *0,4 ths. rub/t.
